

NMEA 2000® Networking

Actisense aim to be the installer's product of choice by making navigation safer with the most reliable boat electronic systems.

Our range of products are developed to exceed industry standards and provide a high level of quality and technical sophistication.

Our range of NMEA 2000® Micro connectors and cables has been designed using our specialist NMEA knowledge.

With our excellent Customer and Technical Support, we offer the products and service you'd expect from an industry leading brand.

We take great pride in our intelligent design and exacting manufacturing standards, ensuring the products we develop are the products you want and need.

The 'A2K' range is developed alongside our other products to ensure optimum performance and compatability is maintained.

The specialist range of products work seamlessly together with other manufacturer's products that use DeviceNet standards.

"intelligent product that exceed the
NMEA standards"
- Phil Whitehurst, C.E.O

We have been representing Actisense in the US market for over 15 years now. Actisense offer one of the most complete

NMEA 2000® product lines available. Seemingly simple items like their T connectors with dual attachment points and built-in standoff, or the innovative and flexible NGW-1 NMEA 0183 to NMEA 2000® data converter have shaped this market segment and accelerated adoption of the NMEA 2000® protocol. Actisense has taken a defining leadership role in our industry and we are so proud to be representing them.
